### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The first paragraph of specification submitted 8/13/02 has been amended as follows:

This application is a continuation-in-part of application serial number 10/056,113, filed on January 28, 2002, now abandoned, by the inventor hereof and entitled "RADIATION MEASUREMENT WITHIN THE HUMAN BODY", the specification of which is incorporated by reference herein.

1. The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate or render obvious a displacement dosimetry method for in-vivo measuring of dose rates within a radiation field by inserting a scintillating fiber into a human body and determining the functional displacement difference. Nishizawa et al. (5,905,263) disclose a depth dose measuring device to measure an amount of absorbed dose by removing the Cerenkov light and thereby measuring only scintillation light but do not explicitly disclose detecting the position of the scintillating fiber within a

human body, incrementally displacing the insertion end of the scintillation fiber by a small distance  $\Delta l$  to a new detected position  $l + \Delta l$ , and determining dose rate according to the following expression: Dose Rate =  $C \times \Delta V / \Delta l$ , where C is a coefficient,  $\Delta V$  is the change in voltage output of the light intensity measuring device which results from the insertion end of the scintillating fiber being moved between the positions  $\Delta l$  and  $l + \Delta l$ , and  $\Delta l$  is the amount of incremental displacement.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Baisakhi Roy whose telephone number is 571-272-7139. The examiner can normally be reached on M-F (7:30 a.m. - 4p.m.).
